

PIAZZA 700 at Stadler Rheintal AG in St.Margrethen

Outdoor underfloor distributor for flexible power supply

Customer:	Stadler Rheintal AG, St.Margrethen
Requirement:	Quick power supply, traversable cover (D400)
Solution:	PIAZZA 700
Article:	182051
Quantity:	4
Areas of application:	Platform and gravel bed, production sites, production buildings, marketplaces, parking spaces, event halls

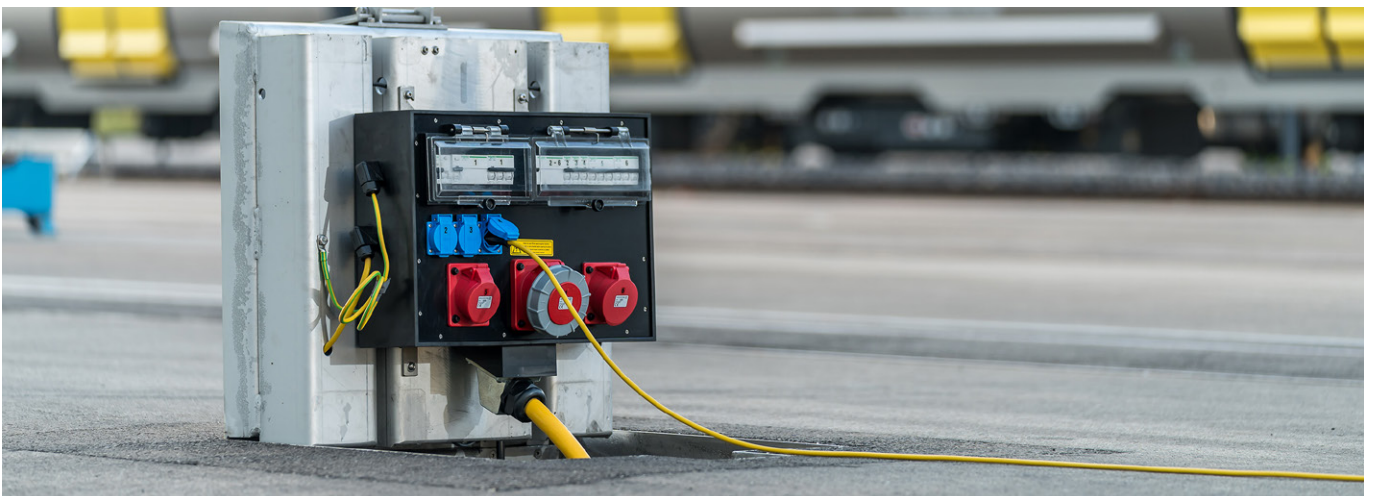

Initial situation

The renowned Swiss rail vehicle manufacturer Stadler Rail AG was searching for a suitable solution for the new location in St. Margrethen SG, to ensure quick and easy power supply for certain finishing works. Various vehicles cross the area and therefore, the solution also needed to withstand vehicle traffic. The power distributor in the model PIAZZA 700 was fitted in conformity with the specifications and the entire high-grade steel construction was positioned in the road surface as well as directly in the gravel bed. When not in use, the underfloor distributors are almost invisible and do not pose a trip hazard.

Customer benefits

- electrical power is available anytime and in seconds
- no power cable lying around, therefore no stumbling danger
- temporary installations are no longer needed
- protection against vandalism thanks to lockable cover
- traversable, different load classes
- almost invisible when not in use
