

LaneLED INOX42 – Handrail «Xundheitszentrum»

The illuminated handrail makes visiting the «Xundheitszentrum» medical centre easier for all age groups.

Customer/installation engineer:	Wenger+Wirz in collaboration with Bach Metallbau
Requirement:	Illumination for the barrierfree entrance without bollard and candelabra
Solution:	LaneLED INOX42
Quantity:	ca. 21 m
Areas of application:	<ul style="list-style-type: none"> – Underpasses and overpasses in railway stations – Escape route and emergency staircases – Decorative applications in office or exhibition wings – Private and public buildings and ways

Initial situation

The entrance area ramp was poorly illuminated and safe access to the «Xundheitszentrum» was difficult, especially in the winter. The objective was the construction of a safe and illuminated entrance area. The handrail makes the ramp more visible and allows older patients to enter and exit safely. It also helps prevent slip hazard during winter.

Customer benefits

- Improved safety in the dark
- Protection against tripping
- Age and weather-resistant
- Slim, timeless design
- New construction of the health centre «Xundheitszentrum» according to the latest guidelines for public buildings
