

BetaLUXX for technical room lighting

Perfect illumination of the technical area in the cellar of the detached house

Customer/installation engineer:	Detached house
Requirement:	Room lighting (private cellar/technical room)
Solution:	BetaLUXX
Article:	860628
Quantity:	5
Areas of application:	cellar, vehicle halls, workshops, store, outside area, industrial halls

Starting situation

The customer wants a lighting solution to be mounted as easily and energy-saving as possible for his technical room and workshop. In addition, the lamp must stand out for a good light distribution. With its perfect illumination, the installation clips and the robust construction the BetaLUXX meets all requirements. On account of the pluggable version, the installation time could be optimised.

Customer benefits

- high efficiency and uniformity of illuminance
- robust
- power-saving (low power/energy consumption with high light power)
- staidurcnless spring steel (1.4301) mounting bracket
- pluggable
- with feed-through wiring
