

LaneLED INOX42 as a stylish terrace illumination

Elegant privacy screens with accent lighting

Customer/installation engineer:	Werner Meier, Hundwil AR
Requirement:	Accentuate privacy screens with integrated handrail lighting
Solution:	LaneLED INOX42 illuminated handrail mounted on laser-cut privacy screens
Article:	LaneLED INOX42 type 11, warm white, clear cover profile
Quantity:	8 meters
Areas of application:	Terrace railing, underpasses and overpasses in railway stations, escape route and emergency staircases, decorative applications in office or exhibition wings, hotels and restaurants, staircases, private and public pathways

Starting situation

A large terrace is built onto a house in the countryside with a holiday apartment. The ground around the terrace falls away steeply. A railing is therefore essential. An illuminated handrail was desired as a finishing touch, in order to accentuate the laser-cut pattern in the privacy screens with light.

The filigree pattern is illuminated by soft LED light from the handrail.

Customer benefits

- anti-fall protection
- attractive accent lighting
- solid stainless execution in V4A
- durable high-quality component parts
- maintenance- and service-friendly
