

Gamprin church (FL) shines in the light of the DeltaLUXX

Church illuminated in white light

Customer/installation engineer:	Catholic church Gamprin (FL) / installer: Gregor Ott, Nendeln (FL)
Requirement:	Homogenous illumination of the church
Solution:	DeltaLUXX LED spotlights
Article:	DeltaLUXX 240 Watt, 5'000 Kelvin
Quantity:	4 (2×60° and 2×120°)
Areas of application:	Outdoor and indoor application (e.g. hall lighting, basic lighting, area lighting, etc.)

Starting situation

The catholic parish Church of the Assumption of the Virgin Mary can be seen from a great distance and large parts of the Principality of Liechtenstein and the Rhine valley owing to its location on church hill at 467 m above sea level.

The outdoor LED spotlights had seen better days and needed to be replaced by a modern, high-performance product. A narrower distribution of the light spots was required, in order to provide uniform illumination of the church. The DeltaLUXX spotlights with 5,000 kelvin and various beam angles achieve the desired effect.

Customer benefits

- robust housing made of corrosion-resistant die-cast aluminium
- low heat generation thanks to the latest LED technology
- low energy consumption with high light output
- maintenance-free
- wide operating temperature range (up to +60° C)
- many accessories available from stock
- various light dispersion characteristics available
