

## Hard rubber power distribution boxes on special columns

Client:

Port Estavayer- le-Lac

### Task

A new electrical power supply for the boats and embarkation points was necessary for the reconstruction of the old harbour.

### Features

- solid, hard rubber box, completely isolated, light grey, halogen-free
- increased security, thanks to particular FI-protected socket-outlets
- installed on a hot-dip galvanised column
- adapted to the constructional situation
- conical roof to protect the socket-outlets against changing weather conditions
