

## Power columns on the Bellinzona camping site

Old distribution boxes are replaced by new GIFAS distribution boxes with a water connection

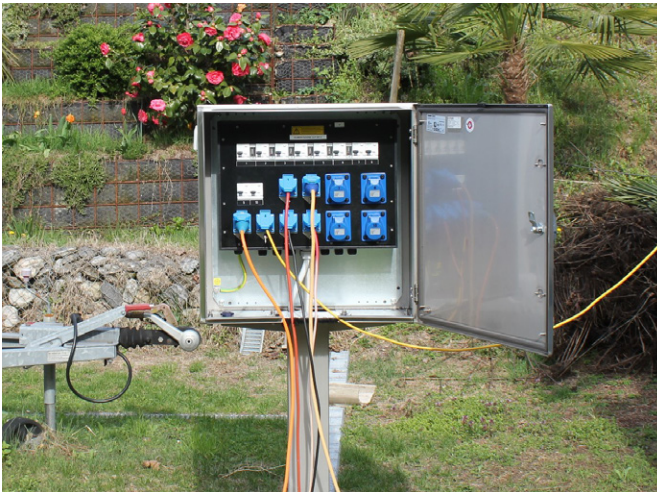

<b>Customer/installation engineer:</b>	Camping Bellinzona Leonardi
<b>Requirement:</b>	New long-lasting distribution boxes
<b>Solution:</b>	GIFAS camping power columns with a water connection
<b>Item no.:</b>	187348
<b>Quantity:</b>	9
<b>Areas of application:</b>	Campsite

### Starting situation

The owner had several old distribution boxes on the camping site with a defective housing and equipment which no longer met the standard. He therefore went online in search of camping distribution boxes and stumbled on the GIFAS power distribution boxes. The requirement was for each tenant or tourist to have the possibility of using a nearby water and electric power supply. The decision was therefore made to opt for camping distribution boxes which can be fitted to customer requirements.

### Customer benefits

- integrated meter for simple recording of the power consumption
- power column combined with a water connection
- camping distribution boxes made of high-grade stainless steel provide a reliable electric power supply for mobile homes and caravans.
- the rugged design of the power column offers protection against vandalism and unauthorised electricity procurement and is also resistant to extreme weather conditions.
