

More safety through illuminated ES-LED 160 power columns

ES-LED 160 energy columns presented in style along the way

Customer/installation engineer:	Community Salvan VS
Requirement:	Walkway illumination
Solution:	ES-LED 160 energy column
Item no.:	Height 400 mm and 800 mm
Quantity:	16
Areas of application:	Garden, Parking space, Walkway illumination

Starting situation

The public path around the school building and the church should be lit in line with the architecture. The stylish solution was found with our aluminium ES-LED 160 energy column.

Due to the variable column height, the lighting could be optimally adapted to the surroundings. The PMMA luminaire head is the right choice for public areas due to its durability.

Customer benefits

- direct mains supply connection (no power supply unit needed)
- 360° light distribution
- 2 light colour variants available
- low power consumption
- long lifetime
- vibration-resistant
