

Power column with lighting and an integrated security camera

Entrance area provided with good illumination and a security camera

Customer/installation engineer:	Private house in Grub AR/Hochreutener Elektro AG in Grub AR
Requirement:	Installation of a security camera including ambient light
Solution:	Luminaire head, on ES 160 with a height of 600 mm
Item no.:	Art.-Nr. 197451, painted in RAL 9001 white
Quantity:	1
Equipment:	ES-LED luminaire head, 4,5Watt cool white, operating voltage 230VAC
Areas of application:	outdoor areas, entrances, walkway illumination, gardens

Starting situation

The entrance to the house, which is surrounded by a brick wall, leads past a gate. The aim was to equip the entrance area with a security camera and lighting.

The ES-LED 160 complete solution enabled an installation of the camera and lighting of the entrance area. The power column was mounted on the existing brickwork and is now perfectly integrated in its surroundings.

Customer benefits

- direct mains connection (no power supply unit needed)
- retrofit equipping possible
- long lifetime
- colour of the column to customer requirements
- 360° light distribution
