Requirement:	New lighting for retention basin, 3952 Susten
Solution:	Different light models for different locations
Article:	4 × Item no. 860938 StreetLED CUBE 48, 57W/4'000K 4 × Item no. 860939 StreetLED CUBE 72, 86W/4'000K 3 × Item no. 800296 DeltaLUX 2 250, 270W/5'000K 6 × Item no. 206368 StreamLED 2 40, 35W/5'000K
Areas of application:	StreetLED CUBE: Roads, crossroads, car parks, open spaces and industrial sites DeltaLUX 2: Area lighting, production and workshops, industrial and storage halls StreamLED 2: Tunnels, tunnels, sewage treatment plants, water reservoirs, power stations

Starting situation

Hidden in the dark, the passages suffered from insufficient lighting, which hindered camera surveillance and posed a safety risk. In addition, the technology of the existing lights was no longer up to date. With the innovative lighting solutions from GIFAS, the reservoir now is in a new light. Depending on the location, different types of our luminaires were used. They all help to make this dam more visible and thus also take the safety aspect into account.

Customer benefits

- advice on site
- energy-saving solution
- weather-resistant materials
- maintenance-free
- all three systems from the same supplier: GIFAS!
